

Year 1 Weekly update: 18th June 2018

Messages:

On Tuesday 19th June, Duncombe are holding a Science Fair. Parents are welcome to visit between 1.30pm and 2.30pm.

Our school trip to Frinton is happening this Friday 22nd June. If your child is not coming on the trip, please bring them to school in their school uniform as usual.

Maths:

This week, the children will be learning about money and time. They will learn to use the language of time, including telling the time throughout the day, using o'clock and then half past. They will also learn about the value of different denominations of coins and notes.

English:

The children will be planning and writing a set of instructions. As part of their science topic, *Plants*, the children planted sunflowers last week. This week, they will write instructions to explain how to plant a sunflower. They will also learn about imperative ('bossy') verbs.

Topic and science:

In topic, the children will write information texts about sea creatures.

In science, the children will predict what might happen to a plant in different conditions (no water, no sunlight or too much water).
