

Reminders:

Please bring a named water bottle for your child each day and take it home to wash and refresh at the end of the session. It is important to fill the bottles with water and **NOT juice or flavoured water** please.

Reading

It is important that you read every night with your child.

Keeping safe

Please make sure you close the top bolt on our outside gate to keep our children safe.

Thank you.

Topic/Literacy

This week in Literacy, we have been reading a non-fiction book about chicks: 'From egg to chicken'. We have been labelling a picture of chicks using our knowledge.

The children have been focusing on the first signs of spring. They have been learning about the life cycle of seeds and they planted seeds. The exploratory play in soil was fun, as well as exploring different fruits and vegetables.

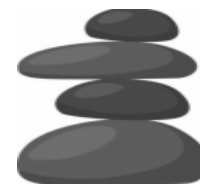

Challenge:

Can we still focus on our physical development of zipping up our coats?

Can you film your child singing a song and send it to me so that we can share with the children during our 'Share and tell' sessions?

Home Learning Task 2 – Exploring Stones

Have you completed the home learning task from last week?

With the help of your grown up try counting all the stones you gathered. Can you use your stones to build a tower? How many stones can you stack on top of each other to make the tallest tower before they fall down? You could take a photo of your tower of stones and tweet it to our school tweeter or send an email to our class email:
